

AMCO

ARCHITECTURAL PLANTERS & LANDSCAPE ELEMENTS

PLANTERS FOR VISIONARIES

SINCE 2013

crafted for the built environment

For over 13 years Amco has partnered with architects, landscape architects, interior designers, hospitality groups and developers to create planter solutions that elevate the spaces people experience every day.

Manufactured in Cape Town, our collections combine design integrity, durability and custom capability, allowing each project to be approached with both creativity and practicality.

From private residences and wine estates to hotels, restaurants, retirement developments and commercial landscapes, our planters are designed to become part of the architecture rather than simply sit within it.

what we offer

Architectural GRC Planters

Fibre Cement Planters

Bespoke Design & Manufacturing

Large Scale Commercial Solutions

Hospitality & Residential Projects

Delivery

arrival

The most memorable spaces
begin long before the front
door. Through scale,
proportion and planting,
AMCO planters help define
and create a sense of
destination.

hospitality

From hotel entrances & restaurant terraces to wine estates and spa retreats, AMCO planters bring scale, sophistication and durability to hospitality spaces.

Beautifully crafted and built to last, they create memorable environments that leave a lasting impression. They provide a sustainable solution that supports both exceptional spaces and responsible design.

resorts

residential

From terraces & courtyards to pool areas & patios, AMCO planters are designed to become part of the home rather than simply sit within it.

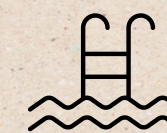

Our collections balance scale, durability & timeless design to create spaces that feel considered, welcoming & enduring.
